Yuichi Shiraishi
National Cancer Center Research Institute

Yuichi Shiraishi graduated from the Department of Mathematical Engineering and Information Physics, Faculty of Engineering, The University of Tokyo in 2003. In 2008, he earned a Ph.D. in Statistical Science from the Department of Statistical Science, The Graduate University for Advanced Studies. Subsequently, he joined RIKEN as a Special Researcher in the Cell Systems Modeling Research Team. In 2010, he transitioned to the Institute of Medical Science at the University of Tokyo. He also served as a Visiting Researcher in the Department of Genetics at the University of Chicago in 2014. In 2020, he was appointed as the Chief of the Division of Genome Analysis Platform Development at the National Cancer Center Research Institute. Over recent years, he has consistently engaged in the development of analysis platforms for large-scale cancer genome sequencing data, building upon a foundational understanding of statistical science and pioneering new information analysis methods for cancer genome data.
